

MARKING SOLUTIONS

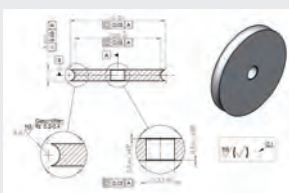

Cables, wires & hoses

siba uses its many years experience in the field of cable printing to offer printing solutions adapted to any kind of printing form and substrate.

We also offer a whole range of accessories necessary for quality printing. We will answer any specific need and offer you adapted technical advising.

We can design and manufacture any kind and size of wheels or rollers, depending on your specific requirements.

siba is very concerned in simplifying communication with their customers and making their life as easy as possible.

Our order form can be filled out digitally and sent by email to our dedicated service. All the technical contents will be directly taken over in our production workflow and guarantee the exact reproduction of the customer requirements.

Gravure printing

Wheels are made of special hardened steel with high gloss chrome finishing. The chrome deposit gives the best life cycle to our product.

Items and consumables dedicated to the quality printing of cable and hoses:

- Concave and flat wheels laser engraved
- Nylon and steel scrapers for different applications
- Soft rubber transfer rolls for indirect printing

gravure printing

embossing & indenting
